

Dev Ops Engineer

Job brief

We are currently recruiting a DevOps Engineer to help us build functional systems that improve customer experience.

In this role your responsibilities will include deploying software updates, identifying production issues and implementing integrations that meet customer needs. You should have a solid background in software engineering and be familiar with Java and Python.

Ultimately, you will execute and automate operational processes fast, accurately and securely.

Responsibilities

- Implement integrations requested by customers
- Deploy updates and fixes
- Provide Level 3 technical support
- Build tools to reduce occurrences of errors and improve customer experience
- Develop software to integrate with internal back-end systems
- Perform root cause analysis for production errors
- Investigate and resolve technical issues
- Develop scripts to automate visualization
- Design procedures for system troubleshooting and maintenance

Requirements

- Honours degree in computer science, computer engineering or a related field
- Work experience as a DevOps Engineer or similar software engineering roll

- In-depth knowledge of cloud infrastructure and management (AWS)
- Good knowledge of Java and Python
- Working knowledge of PostgreSQL and DynamoDB
- Excellent problem-solving skills
